

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A laminated tube having another layer ~~an outer layer~~ laminated on a substrate layer that makes up ~~the~~ a main body of said tube, wherein a projecting portion or portions extending all the way down the tube in an axial direction is/are formed on said another layer at a predetermined width ~~said outer layer has or consists of a projecting portion disposed in the axial direction.~~
2. (Currently Amended) The laminated tube according to ~~Claim 1~~ Claim 1, wherein said substrate layer is more flexible than ~~while~~ ~~said outer~~ another layer, which is harder than said substrate layer.
3. (Currently Amended) The laminated tube according to Claim 1, ~~Claim 1~~ wherein said projecting portion is linear.
4. (Currently Amended) The laminated tube according to Claim 1, ~~Claim 1~~ wherein a multiple number of projecting portions are disposed.
5. (Currently Amended) The laminated tube according to Claim 1, ~~Claim 1~~ wherein a pair of projecting portions is disposed axisymmetrically in ~~the~~ a cross-sectional view.
6. (Currently Amended) The laminated tube according to Claim 4, ~~Claim 4~~ wherein said projecting portions have different widths.
7. (Currently Amended) The laminated tube according to Claim 4, ~~Claim 4~~ wherein an even number of projecting portions is disposed at equal intervals.
8. (Currently Amended) The laminated tube according to Claim 1, wherein said ~~outer~~ another layer having or consisting of ~~the~~ said projecting portions gives a graded effect caused by ~~the~~ a change in the thickness of ~~the~~ said laminated outer layer.

9. (Currently Amended) The laminated tube according to Claim 1, wherein ~~the~~ said substrate layer is made of an aluminum-laminated material.

10. (Currently Amended) The laminated tube according to Claim 1, wherein ~~the~~ said main body of said tube and ~~the outer~~ said another layer have different colors.

11. (Currently Amended) The laminated tube according to Claim 1, wherein said projecting portion or portions ~~are~~ is/are spirally disposed.

12. (Currently Amended) The laminated tube according to Claim 1, wherein said projecting portion or portions ~~have~~ has/have a wave form.

13. (Previously Presented) The laminated tube according to Claim 1, wherein each projecting portion has a different color.

14. (Currently Amended) A molded tube product comprising the laminated tube according to Claim 1, ~~Claim 1~~ wherein said tube is cut to a given length, flattened and sealed at one end, and is provided with a head portion of a shoulder and a neck at ~~the other~~ another end.

15. (Currently Amended) A molded tube product comprising the laminated tube according to Claim 1, ~~Claim 1~~ wherein said tube is cut to a given length, flattened and sealed at both ends.

16. (New) A molded tube product comprising the laminated tube according to Claim 1, wherein said projecting portion has an axially uniform thickness.

17. (New) The laminated tube according to Claim 1, wherein said projecting portion serves as a backbone of the main body of the tube and stably maintains form of the tube.
